

ABSTRACT

5 A sewing thread containing 30% by weight or more of
a poly(trimethylene terephthalate)-based staple fiber,
and showing a breaking elongation of 30 to 100% and an
instantaneous elastic recovery at a 5% elongation of 30
to 75%. This improved sewing thread has excellent
suitability for sewing. With this sewing thread, sewn
clothes which give no tight feeling and are highly
10 comfortable to wear can be made.
